MARYLAND WATER QUALITY FINANCING ADMINISTRATION (MWQFA)**

**Addendum #1  
Federal Fiscal Year 2008 Intended Use Plan  
Maryland Water Quality Revolving Loan Fund (WQRLF)**

**I. INTRODUCTION AND PURPOSE**

The purpose of this addendum is to provide the United States Environmental Protection Agency (EPA) an amended Clean Water (CW) FFY 2008 Project Priority List (PPL) and an amended Clean Water (CW) FFY 2008 Intended Use Plan (IUP) to seek federal grant award under the American Recovery and Reinvestment Act of 2009 (ARRA or Stimulus). The initial final FFY 2008 CW IUP was submitted to EPA on July 16, 2008 (to seek federal capitalization grant award for FFY 2008 funds) and is being incorporated here by reference.

The State of Maryland is committed to using the ARRA capitalization grant funds for which we are applying to provide assistance to wastewater, nonpoint source, and other eligible green, water or energy efficiency improvements or environmentally innovative ("Green") projects that will proceed quickly to construction and assist in preserving or creating jobs and broadening economic benefits, while furthering the water quality objectives of the Clean Water Act.

**II. SOURCES AND USES OF FUNDS**

Figure 1 shows that to secure the Federal ARRA grant, the addendum amends the FFY 2008 IUP by adding new capital projects totaling \$92,784,600. Under ARRA, at least 50% of the funds must provide additional subsidies. This addendum allocates 54% of the funds or \$50,392,300 for loan principal forgiveness or grants. Twenty percent (20%) or \$18,956,920 of the capitalization grant requested is targeted for "green" capital projects (grants or loan principal forgiveness). The addendum also includes \$2,000,000 of the total ARRA funds for WQRLF program administrative expenses.

Table 1 (attached) of this addendum identifies capital projects for \$104,561,053 included in the initial final FFY 2008 CW IUP along with an administrative expense allowance of \$658,322 for total FFY 2008 CW IUP funds of \$105,219,375. In addition, Table 1 identifies "ARRA" capital projects totaling \$92,784,600 and an administrative expense allowance of \$2,000,000. Table 1 contains traditional point source, non-point source, green infrastructure, water or energy efficiency improvements and environmental innovation projects. The financial summary of the addendum to the FFY 2008 Intended Use Plan is as follows:

**Figure 1: Sources and Uses of Funds**

<b>Amended 2008 IUP: All Sources</b>		<b>Amended 2008 IUP: All Uses</b>	
Federal 08 Grant & Other Sources	\$ 105,219,375	WQSRF Admin. Exp. (4% of grant) 2008 IUP	\$ 658,322
		Capital Projects - All sources 2008 IUP	\$ 104,561,053
<i>Subtotal Original IUP</i>	<i>\$ 105,219,375</i>	<i>Subtotal Original IUP</i>	<i>\$ 105,219,375</i>
ARRA Federal Grant	\$ 94,784,600	WQRLF Administrative Expense Allowance	\$ 2,000,000
		Stimulus Projects (Loans)	\$ 42,392,300
		Stimulus Projects 34% (Add. Subsidy)	\$ 31,435,380
		"Green" Reserve 20% (Add. Subsidy)	\$ 18,956,920
<i>Subtotal ARRA</i>	<i>\$ 94,784,600</i>	<i>Subtotal ARRA</i>	<i>\$ 94,784,600</i>
<b>Total: All Sources</b>	<b>\$ 200,003,975</b>	<b>Total: All Sources</b>	<b>\$ 200,003,975</b>

### III. CRITERIA AND METHODS FOR DISTRIBUTION OF FUNDS

#### A. Project Selection and Funding Process

To provide applicants an opportunity to seek federal ARRA funds, additional Financial Assistance Pre-Applications for water quality (point source, non-point source, green infrastructure, water or energy efficiency or environmental innovation) capital projects were accepted through February 28, 2009. Eligible projects that are ready to start construction by December 2009 were amended into the FFY 2008 CW PPL. The amended FFY 2008 CW IUP funding list (Table 1) includes projects identified for Federal ARRA funding that were selected from the amended FFY 2008 PPL based on the following criteria:

1. Readiness to start construction by 12/31/09
2. Project priority ranking using existing rating systems
3. Providing ARRA funding across Maryland (minimum one project in each County)
4. No single applicant to receive more than \$6M (grant and/or loan) from each Fund (unless required to meet green reserve or through reallocation)
5. Projects in Disadvantaged Communities or Environmental Benefits Districts are eligible for grants
6. Green and Non-point source projects eligible for grants
7. All other projects eligible for low interest rate (0% or 1%) loans based on available funds

#### B. Project Bypass and Reallocation Criteria

Subject to the criteria above, all projects shown as selected on Table 1 are currently targeted to start construction by 12/31/2009. To comply with the 12/31/2009 construction start date, **any applicant that does not submit their approvable final plans and specifications to MDE by 7/30/2009 and does not open bids by 9/30/2009 will be bypassed for stimulus funding.** Funding from bypassed projects will be reallocated to waiting list projects on Table 1 or the PPL based on readiness to proceed to construction before 2/16/2010 or within 120 days after re-allotment, whichever is earlier. Notwithstanding funding levels, reallocated funds may also be provided to partially funded projects already under construction that were previously funded with stimulus or base program funds. Waiting list or PPL project applicants are strongly encouraged to stay in contact with MDE in case funds are reallocated after 9/30/2009.

#### C. Re-allotment

Should additional federal ARRA funds become available through EPA's reallocation of unused funds from other States, the MWQFA intends to seek additional ARRA allocation and will provide EPA a list of additional shovel ready projects from MDE's PPLs using the criteria above. Table 1 identifies partially funded projects that can use additional funds.

#### D. Early Start Preference

The ARRA requires that, notwithstanding priority ranking, any project that initiates construction within 120 days of ARRA enactment (June 17, 2009), shall be given funding preference. Project applicants on the PPL are encouraged to submit their approvable final plans and specifications to MDE expeditiously, if they wish to seek funding priority by meeting the construction start before June 17, 2009. Their eligibility for funding will be based on the funding process in Section A.

#### E. Green Infrastructure, Water and Energy Efficiency and Environmental Innovation Projects

The State of Maryland has made a concerted effort to actively solicit "Green" projects that may be able to use ARRA resources to help restore Maryland's tidal and non-tidal water resources as part of the larger goal of Chesapeake Bay restoration. Green projects are integral to the innovative approach Maryland has taken through the Chesapeake Bay Tributary Strategies to address water quality issues throughout the Maryland portion of the Bay watershed. With the ARRA funds, Maryland is focusing on "soft" water resource restoration and protection projects. The projects include living shorelines (innovative techniques incorporating vegetative planting to protect shorelines while creating valuable tidal habitat); stream, riparian and floodplain ecosystem restoration using methods that utilize native planting, and naturally occurring rocks and boulders; wetlands creation and restoration; biofiltration, and primarily other similar non-structural projects.

#### **F. Amended Interest Rates and Loan Terms**

This addendum changes the interest rates and loan terms for the CW FFY 2008 IUP and Federal ARRA projects identified on Table 1 that start construction and enter into loan agreements with the MWQFA through 12/31/2009.

Loan Terms: Up to 20 Years

Interest Rate: Standard Rate = 1%  
Disadvantaged Community (DAC) Rate = 0%

Administrative Fee: 5% of Debt Service collected annually (Only applies to Non-Disadvantaged Communities)

#### **G. Additional Subsidization and Eligible Recipients**

The ARRA states that notwithstanding the requirements of section 603(d) of the Federal Water Pollution Control Act, the State shall use not less than 50 percent of the amount of its capitalization grants to provide additional subsidization to eligible recipients in the form of forgiveness of principal, negative interest loans, or grants, or any combination of these. To comply with this provision, eligible applicants may receive up to 100% of the project cost as grant or loan forgiveness based upon the criteria below:

1: Any publicly owned treatment works (POTW) applicant that meets MDE's Disadvantaged Community Criteria (DAC). The Disadvantaged Community Criteria for Federal ARRA projects is defined as:

- a. Any community with Median Household Income (MHI) less than \$47,810 (70% of the State MHI); or,
- b. Any community with average sewer user rate per year per Equivalent Dwelling Unit (EDU) that exceeds 1% of MHI.

The point source projects that qualify as DAC may be provided up to 100% of project cost as grant or loan forgiveness. Any DAC or additional subsidization project that does not receive up to 100% grant or loan forgiveness will be eligible to receive a loan for the balance of the project cost under the loan terms identified in Section F above.

2: Any applicant undertaking an eligible non-point source, green infrastructure, water or energy efficiency improvement or environmental innovation project. These project applicants do not generally have a dedicated source of revenue, such as a user charge system, to repay a loan.

3: Any applicant undertaking an eligible project within MDE-defined Environmental Benefits Districts. MDE's Environmental Justice Program has designated areas within three Maryland counties as Environmental Justice Communities or Environmental Benefits Districts (EBDs). Environmental Benefits Districts are places where State government and other stakeholders can focus their financial, technical, regulatory, administrative, policy and other appropriate resources to benefit targeted communities. The EBD initiative was developed by MDE to foster sound environmental practices, healthy and safe communities, and proactive economic development. The approach targets communities where citizens may not have the resources to address environmental concerns. Additional information on EBDs is available from MDE by request.

#### **H. Administrative Expenses**

Figure 2 shows a total of \$2,000,000 of the ARRA funds are being reserved for WQRLF administrative expenses. This revenue supports contractual services for design review, compliance with federal requirements in contracts, construction inspection monitoring, staff salary and other eligible expenses related to ARRA and other WQRLF projects, as summarized below:

Figure 2: Administrative Expenses

<b>Indirect Costs</b>			
<b>Item</b>	<b>Est. \$ Amount</b>	<b>% of Total</b>	<b>Notes</b>
Salary and Fringe	\$ 400,000	20.00%	
Indirect Overhead (21.49%)	\$ 85,960	4.30%	
Contractor Fees	\$ 1,490,000	74.50%	
Travel/Training	\$ 12,000	0.60%	
Office Supplies	\$ 12,040	0.60%	
<b>Total</b>	<b>\$ 2,000,000</b>	<b>100.00%</b>	

#### I. Examples of ARRA Projects and Environmental Benefits

The following are examples of the type of projects selected for financial assistance in the amended FFY 2008 CW IUP/PPL. The projects will be reported based upon the requirements of the ARRA.

1. Ballenger Creek WWTP Enhanced Nutrient Removal Upgrade: This Frederick County 15 MGD ENR upgrade project will reduce the total nitrogen down to 3 mg/l and help to annually reduce 274,000 pounds of nitrogen from entering into the Chesapeake Bay.
2. Patapsco WWTP Enhanced Nutrient Removal Upgrade (Contract 1 of 3): This Baltimore City 73 MGD ENR upgrade project, upon completion, will reduce the total nitrogen down to 3 mg/l and will help to annually reduce 3.3 million pounds of nitrogen from entering into the Chesapeake Bay.

#### IV. Public Notice

The Final amended CW FFY 2008 IUP and amended CW FFY 2008 PPL was posted on MDE's website on March 20, 2009 to provide public notice, as required by the existing IUP amendment policy (see [www.mde.state.md.us/wqfa](http://www.mde.state.md.us/wqfa).) No Public Hearing is being scheduled. Applicants identified for ARRA funding will be formally notified.

#### V. Assurances and ARRA Reporting

The Department agrees to comply with the Federal program requirements as outlined in the Operating Agreement between EPA and the State of Maryland dated November 5, 1997, and which was last amended and updated on March 17, 2008. The Department is working to obtain the necessary authority to provide the additional subsidies required by the ARRA. (Maryland House Bill 1417 – emergency legislation effective upon passage). In addition, MDE agrees to report the data required by ARRA and EPA's final SRF guidance into the Clean Water Benefits Reporting Database (CBR).
